ALARM CORE WITH 3.5 AUDIOLOCK

One solution to stock, train and fit. Power and alarm devices with a single coil cable. Optimum security with maximum user experience.

SECURES ANY DEVICE

UNIVERSAL 3.5 AUDIO LOCK

The patent pending 3.5mm audio locking mechanism provides maximum security (538LB pulling force), without having to use a heavy/bulky claw system.

- Equipped with an aircraft grade steel cable, capable of handling “Cut and run” threats.

GREAT IN HAND EXPERIENCE

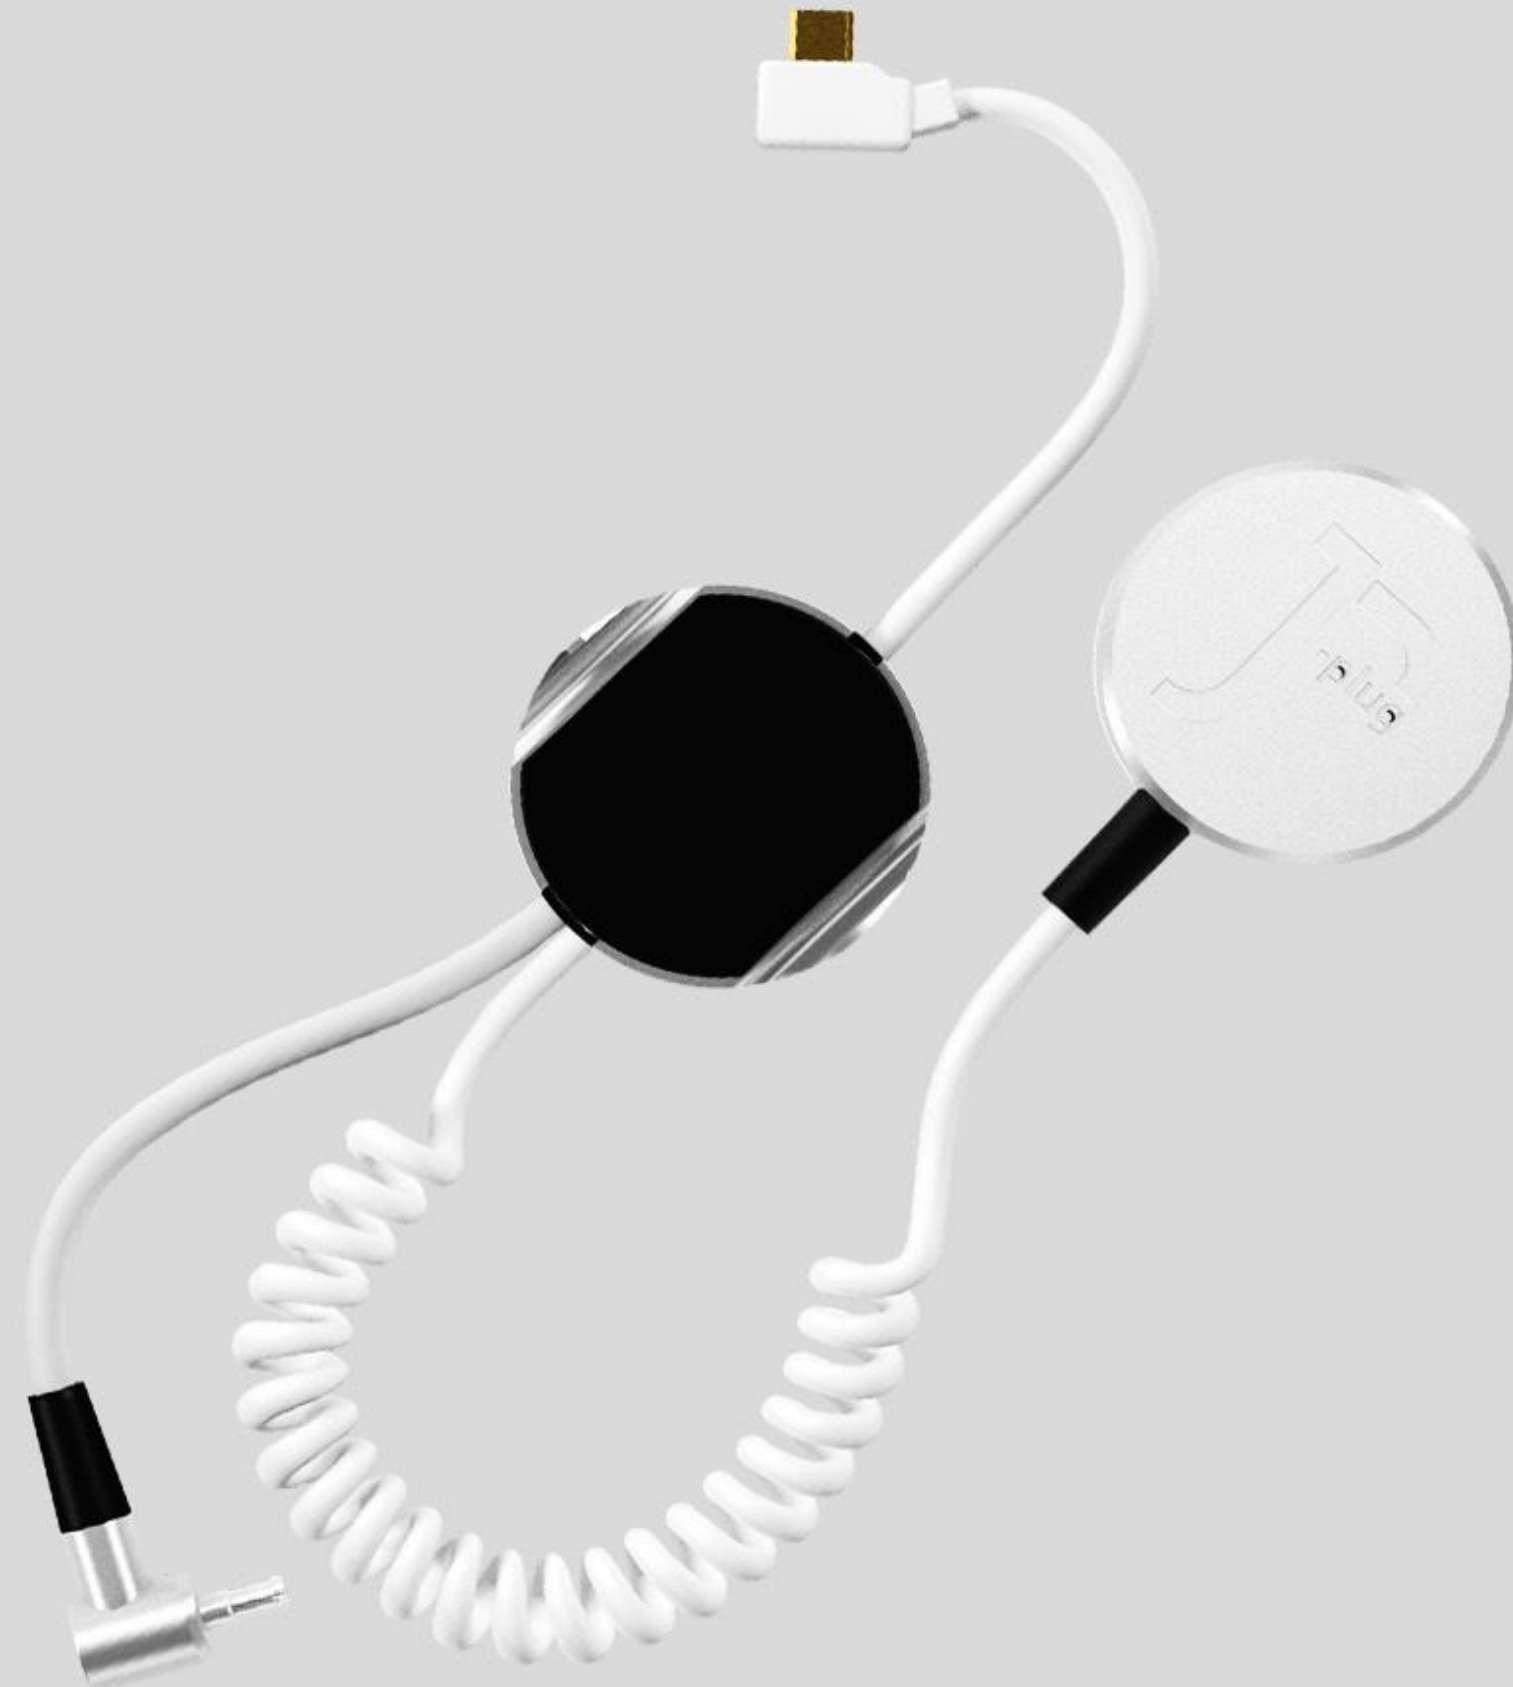

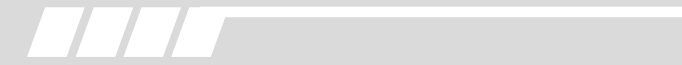

The coil cable can stretch further providing additional cable length for the best possible user experience while keeping cable visibility to a minimum.

- Feel the “True weight” of the device. No heavy security retention or feeling of bulky security attachments.
